Examiner's Amendment

The following has been inserted on page 1 of the specification, before
"GOVERNMENT RIGHTS":

--This application is a CIP of 09/375597, now USPN 6,270,747, filed 8-17-99,
which claims benefit of 60/097,023, filed 8-18-98.--

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed invention is free of the prior art of record because the prior art of record does not teach or fairly suggest a method of reducing goblet cell hyperplasia in an airway of an individual suffering from mucus hypersecretion comprising the administration of an EGF-R antagonist that binds the EGF-R in an amount effective to reduce goblet cell hyperplasia.

Examiner's Comments

Applicants have demonstrated the relationship between the inhibition of EGF-R activation, a reduction in goblet cell hyperplasia, an inhibition of mucin expression and production, and the subsequent inhibition of airway mucus hypersecretion in vivo. EGF-R activation was accomplished using various agents, including EGF ligands, TNF-alpha, cigarette smoke, ovalbumin sensitization, intratracheal instillation of agarose plugs, activated neutrophils and IL-13. Inhibition of EGF-R activation and the subsequent

reduction in goblet cell hyperplasia, mucin production and airway mucus hypersecretion was demonstrated using Tyrphostin Ag 1478, cyclophosphamide, TNF-alpha neutralizing antibodies, NPC 15669, anti-EGF-R antibodies and BIBX1522. These EGF-R antagonists were administered systemically (IP, IV), by intratracheal instillation, and in aerosolized form (lung delivery).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
